

# COFFEE FILTER FLOWER CROWN

After creating your coffee filter flowers, you can create a beautiful flower crown!

## Materials:

- Paper coffee filters
- Bowl(s)
- Food coloring
- Hot glue gun
- Pipe cleaners

**Step 1:** Follow the instructions to create your coffee filter flowers. Instead of mounting your petals on a wood dowel, mount them to a pipe cleaner.

**Step 2:** Create a crown shape with additional pipe cleaners, making sure that your crown fits comfortably on your head. Once finished, wrap the pipe-cleaner stem from your flowers around the pipe cleaners of crown to secure the flowers. The flower crown in this example was made using three flowers. Each flower was made using six filters.
